PMgr: Amy M. Infelt, P.E.

Mech: Bill Holub, P.E.

Elect: David Shelley

This project consisted of a complete renovation of the Radiology Department and addition for the Pre-Admission Services department. The project was constructed in 12 phases with the majority of the renovated area remaining occupied during construction.

The HVAC scope of work included new air handling units with VAV reheat with distribution ductwork, piping and accessories, controlled by a DDC system. In addition, the new air handling systems refeed existing ductwork that served area not renovated.

The electrical scope of work included all new lighting, power and nurse call systems.

Fire safety components of the project included a complete sprinkler system and an addressable fire alarm system serving all the renovated space.

The scope of the mechanical/electrical work included extensive coordination with the mechanical equipment supplier as required for the installation of major new radiology equipment.
